DETAILED ACTION

Response to Arguments

1. Applicant's arguments, see pg. 6, 3rd paragraph, filed December 3, 2005, with respect to claims 1-9 have been fully considered and are persuasive based on the claims as amended. The rejection of claims 1-9 have been withdrawn.

Allowable Subject Matter

2. The following is an examiner's statement of reasons for allowance:

In reference to claim 1:

Amendments to the claims overcome the prior art rejections made in the previous office action. Applicant's arguments with respect to the comparator being arranged upon the programmable logic device were persuasive over the prior art. The prior art of record (Parlour, U.S. 6,904,527) disclosed the comparison occurring on a license manager which resides on a separate computer system and not on the programmable logic device. Parlour failed to teach the comparison of the embedded code residing on the programmable logic device with a software identifier happening on the programmable logic device.

None of the other references cited in the prior action combine with Parlour to disclose the amended limitations to claim 1. An updated search did not uncover any new prior art. Parlour, Allen and Animi are the closest art of record. No art disclosing, nor motivation to combine has been found which recites the comparison of the embedded code residing on the programmable logic device with a software identifier happening on the programmable logic device. It is most common in the art for the comparison to be done elsewhere since the programmable logic

devices are made to be as flexible as possible. All other pending claims are dependent upon allowable claim 1 and are allowable for that reason.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
